Chick Production

March 16, 1961

Commercial hatcheries produced 221, 341, 000 chicks during February, up 12 percent from February 1960. Production of broiler-type chicks totaled 172, 982, 000, up 8 percent from February last year. Eggs in incubators on March 1, 1961, indicate that the March hatch of broiler chicks will also be larger than a year ago. Production of broiler chicks totaled 340, 470, 000 during January and February 1961, compared with 318, 672, 000 during these months in 1960 -- an increase of 7 percent.

Egg-type chicks hatched in February 1961 totaled 48, 359, 000, up 27 percent from the record low hatch of February last year; but 21 percent below the hatch of February 1959. Eggs in incubators on March 1 indicate that the egg-type hatch in March will also be larger than the relatively small March hatch of last year. The production of egg-type chicks during the first two months of 1961 totaled 81, 265, 000, up 32 percent from these months in 1960; but 16 percent below the hatch for these months in 1959.

Poult Production

The hatch of heavy white breed poults during February totaled 2, 519, 000, up 63 percent from February 1960. Other heavy breed poults hatched, mostly broad-breasted bronze, totaled 6, 788, 000, up 26 percent. The hatch of light breed poults totaled 806, 000, down 3 percent from February 1960. For the first two months of 1961 the hatch of heavy white breed poults was up 70 percent from a year earlier, other heavy breeds were up 35 percent, and the hatch of light breeds was up 21 percent.

Turkey eggs in incubators on March 1, 1961, indicate that the numbers of heavy breeds hatched in March will be larger than in March 1960. The hatch of light breed poults will be about the same as in March last year.

Number of Hatcheries and Egg Capacity Reported January 1,
1959 and 1961

The number of chick hatcheries operating at the beginning of 1961 was 17 percent less than the number operating at the beginning of 1959. The number decreased from 4, 257 to 3, 513. Total egg capacity decreased from 530, 057, 000 eggs to 508, 500, 000 eggs. Practically all the decrease in numbers and capacity occurred in hatcheries with egg capacities of 200, 000 egg and less.

The 621 turkey hatcheries operating as of January 1, 1961, compares with 682 on January 1, 1959. Capacity of the turkey hatcheries increased from 45, 544, 000 eggs January 1, 1959, to 49, 730, 000 on January 1, 1961.
